

OCTOBER PARTY PACK!!

What would YOU like to discover? We want you to take something YOU are interested in and develop it into a CDC project. It will be awesome because it is already about something YOU like!

What are some things you are curious about? (For example: current events, favorite things to do)

Pick one idea and consider the following questions:

What do you already know about your topic(s)? Why does it interest you?

Are there any sources to support what you already know? Where can you look for sources?

Clarkson Discovery Challenge
Research Worksheet: What Will You Discover??

What else do you want to learn about your topic?

NOW let's think about how to turn your idea into a RESEARCH question where NEW knowledge is uncovered! Remember, it is not about writing a "book report" or "essay" about your favorite things; it is about outlining a way to discover something and then doing it and sharing your findings!

Write YOUR research question here!

What do you expect to learn or hope to find out? Write your ideas here.
